

## PROFILE

Engineering leader working at the intersection of technology, design, and product, with a strong focus on discovering and shaping what to build. Extensive experience leading ambitious teams in varied domains including generative AI and financial trading. Skilled in growing people, improving processes, AI-assisted engineering, and driving organisational outcomes.

## EXPERIENCE

### Solutions Engineer

Jul 2024 – Present

#### HERE (OpenFin)

Driving adoption of the HERE Enterprise Browser across APAC throughout the full sales cycle. Bridging product, engineering, and customer success.

- Forward-deployed engineer delivering hands-on TypeScript development and architecture for a next-gen desktop platform at a leading Australian institution
- Working directly with customer engineering teams to drive platform understanding and broader adoption
- Advising senior executives on desktop modernisation and AI adoption strategy

### Senior Software Engineer

Jan 2024 – Jul 2024

#### Leonardo.Ai

Software engineering at Australia's leading AI startup during pivotal growth phase just prior to Canva acquisition.

- Led the build of the flagship Image Generation v2 interface and contributed to key features like the Universal Upscaler
- Built with Next.js, React, XState, GraphQL, and rapidly evolving AI image generation models
- Improved delivery cadence, contributed to extensive hiring, and coached the team on scale-up best practices

### Head of UI / UX

Jan 2020 – Sep 2023

#### Yieldbroker

Led discovery, delivery, and UX design of high-performance financial trading platform, combining hands-on engineering, design leadership, and people management.

Engineering leadership

- Chapter lead for all UI engineers: hiring, mentoring, performance management
- Worked with CTO on organisational design across six teams (35+ engineers)
- Led agile adoption and shift to product-led thinking

Software engineering

- Hands-on development of real-time trading platform; code reviews, architecture
- Front-end strategy to migrate from legacy to modern architecture

UX design

- Established UX practice: prototyping, user testing, stakeholder workshops
- Created and maintained design system in Figma and code

## Senior Software Engineer    **Lab49**

Mar 2010 – Dec 2019

Consulted for leading financial institutions on high-performance trading UIs. Specialised in streaming data, complex visualisations, and strict compliance environments.

- UBS: Front-end developer on Fixed Income team for Neo single dealer platform
- Morgan Stanley: UI tech lead on Matrix; led expansion of research features
- Commonwealth Bank: Led multi-year build of metals trading platform, sales dashboards, onboarding
- NAB: Lead JavaScript developer on real-time FX trading platform

## Earlier roles

**Adobe Consulting** - Exclusive social network for the World Economic Forum

**Razorfish, R/GA, Cimex** - Freelance roles at London's top digital agencies

**Doof** - Early employee at hyper-growth online gaming startup

**Catalyst, Learning Curve, Nortia** - Interactive E-Learning platforms

**Art Direction** - Data-driven websites for highly creative design agency

## CORE SKILLS

### Software engineering

TypeScript, React, Next.js, TanStack, Angular, RxJS, Tailwind, React Native, Payload, Playwright, Node, Deno, tRPC, REST, NestJS, GraphQL, Postgres, Drizzle, Vercel, Railway, AWS, Clerk, Sentry, LaunchDarkly, Docker

### AI Developer Tooling

Claude Code, OpenCode, MCP, RAG, n8n, Ollama, Whipser, V0, Lovable, Bolt, etc

### Design

UX, interaction design, Figma, design systems, story mapping

### Management

Continuous delivery, DORA, Team Topologies, Scrum, Lean/Kanban, OKRs

## EDUCATION

### Degree

**Bachelor of Information Technology** (minor in Marketing)

University of Canberra
