PROFILE

Product engineer operating at the intersection of technology, design, and product. Product sense shaped by financial markets, enterprise software, and generative AI, combining customer discovery, interaction design, and hands-on engineering to turn complex problems into intuitive products and experiences.

EXPERIENCE

Solutions Engineer

Jul 2024 – Present

HERE

Driving adoption of the HERE Enterprise Browser across APAC throughout the full sales cycle, bridging product, engineering, and customer success.

- Forward-deployed engineer architecting and developing a next-gen enterprise desktop platform scaling to 80,000+ corporate users, closely embedded with customer design and engineering teams
- Built AI-assisted demos, proof-of-concepts, and interactive prototypes in React and TypeScript
- Worked directly with customer engineering and design teams to shape platform adoption and surface UX opportunities
- Advising senior executives on platform modernisation strategy and industry trends

Senior Software Engineer

Jan 2024 – Jul 2024

Leonardo.Ai

Front-end software engineering and thought leadership at Australia's leading hyper-growth AI startup.

- Led the build of the flagship Image Generation v2 interface, setting the benchmark for UX/UI quality across the product
- Built with Next.js, React, XState, and GraphQL across rapidly evolving AI image generation models
- Contributed to the Universal Upscaler feature; drove delivery improvements and coached the team on scale-up practices

Head of UI / UX

Jan 2020 – Sep 2023

Yieldbroker

Led product discovery, delivery, and UX design of high-performance financial trading platform. Combined hands-on engineering, design leadership, and people management.

UX design

- Established UX practice: prototyping, user testing, stakeholder workshops
- Created and maintained design system in Figma and code

Software engineering

- Hands-on development of real-time trading platform; code reviews, architecture
- Front-end strategy to migrate from legacy to modern architecture

Leadership

- Chapter lead for all UI engineers: hiring, mentoring, performance management
- Worked with CTO on organisational design across six teams (35+ engineers)
- Led agile adoption and shift to product-led thinking

Senior Software Engineer

Mar 2010 – Dec 2019

Lab49

Nearly a decade consulting for leading financial institutions on high-performance trading platforms and banking systems. Delivered complex solutions across the full SDLC in strict compliance and security environments.

UBS: Front-end developer on the Fixed Income Neo single-dealer platform

Morgan Stanley: UI tech lead on Matrix; led expansion of research features

Commonwealth Bank: Led multi-year build of metals trading platform, dashboards, data visualisation, compliance, and client onboarding applications

NAB: Lead JavaScript developer on real-time FX trading platform

Earlier roles

Adobe Consulting

Razorfish, R/GA, Cimex

Doof

Catalyst, Learning Curve

Exclusive social network for the World Economic Forum

Freelance roles at London's top digital agencies

Early employee at hyper-growth online gaming startup

Interactive e-learning platforms

CORE SKILLS

Product Discovery

Stakeholder interviews, workshop facilitation, journey mapping, rapid prototyping, product strategy, experimentation, analytics

Software Engineering

TypeScript, React, Next.js, Tanstack, Angular, RxJS, Playwright, Node, GraphQL, tRPC, Convex, Postgres, REST

Cloud & Infrastructure

Vercel, AWS, Sentry, LaunchDarkly, Entra, SCIM

AI

Claude Code, Codex, OpenCode, MCP, RAG, n8n, Ollama, V0, Lovable, Bolt

Design

UX, interaction design, design systems, Figma, Pencil

Sales & Solutions

Technical discovery, demos, solution architecture, executive engagement, proof-of-concepts, forward-deployed engineering

EDUCATION

Degree

Bachelor of Information Technology

Minor in Marketing

University of Canberra
